The following is the beginning of the talk delivered by Dr. S. Raynou de la Ferriere, Regent of the Universal Great Brotherhood at the first meeting of the Houston Branch of the Universal Great Brotherhood, on the 12th September 1954 at 5.30 P.M.

I wish you to understand that this is not a class on occultism, symbolism, and such like subjects. It is not possible for me to have a class on any subject, because I am not going to stay here long, as I am only passing through Burma for another country.

We do not know from where we have come, why we are here, and where we are going. If a man knows these three things, then he knows everything.

There are different concepts about from where we have come. One concept is that we are composed of seven different bodies coming from 7 different planets. But to know one concept is not sufficient. So long as we have one label, such as Mason, Buddhist, Hindu, Christian, we can only have one particular concept concerning that and not all conceptions of it. But that is the way end that is in the key. We have to follow this traditional path, and this is the path followed by the initiate school.

What I am going to tell you today is not exactly the TRUTH; it is not possible to give the light immediately; you have to go very slowly. It is only the different concepts that I am going to give you today.

From the beginning of the world there existed a group of initiates or masters. I am not speaking about the masters of the astral plane, I am speaking of those who existed in the physical plane. In the beginning of the world the first idea was to form into a group. In the beginning of the world there were not such problems as we have today; there were no problems such as earning a livelihood and so on. Hence they could devote more time for study.

You must admit that you must come from somewhere, from God or from atom or from anywhere. So, the first people who have come from the original and who were adepts were so very near the original source that they had all knowledge. Gradually as time advanced this knowledge was only held by the initiates. Those initiates gave the knowledge stage by stage. Every two thousand years, the disciples of the first initiated masters come to the earth to teach humanity. So in every two thousand years humanity receives a new mission from a group of people so that the traditional Truth may not be forgotten.

A new group has now been started for such purpose. It started in 1947 and is known as the Aquarian Mission. We receive the first teachings of the masters in this group. You must understand that you do not come to this group out of curiosity. It is not a new philosophy that we are going to teach. What is required is the application of knowledge gained by studies. We learn so that we may be able to teach others. We can thus gradually bring all humanity in one brotherhood without distinction of religion, sex or color. Everybody will be taught to be able to teach in turn and if possible we will teach the animals as well. Everybody in the human plane is the same, the only difference is in vibration.

In the beginning there was idea, and this idea was put into writing. The first people wrote from bottom upwards. This is known as the HANGUL writing. These were used by the Koreans, one of the first Indo-Aryan races. Then we have people writing from top to bottom. These are the Arabic writings of the Arabs, the Chinese. Then we have people who write from the right to left. These are Semitic races, such as the Hebrews, Assyrians, Persians, etc.
They write from the East to the West because they think knowledge comes from the East, in the same way as the Sun which rises in the East. Then we have the Occidental people who write from the left to the right. So, you see the black skinned race, the yellow skinned race, the Semitic race and the white skinned race all meeting together in the form of a cross. So you see that the symbol of the cross is not something new, or something Christian. This symbol existed 25,000 years ago in the Sumerian civilization. We see this symbol in the North of India, in the Himalayas, and elsewhere.

Then we have the concept of the positive and the negative, the masculinity and the femininity. In the Hindu religion they have the Mars as the positive sign and the Moon as the negative sign. It teaches us that nothing can be born without the two polarities. Human beings are born with the force of man and woman. The light of electricity comes from the positive and the negative pole. The two polarities in science and religion are the same. The cross is not the sign of Jesus of Nazareth only. It shows Parusha and Pankti of the Hindu philosophy also.

In this cross, I have shown the arrow heads to give you an idea of the 4 different races the four different symbols and the 4 different writings. They all converge on one centre. In that is the ancient mystery, the traditional initiation.

There are four elements in everything, fire, water, air and earth. These are the four physical elements. We then have the etherial and other forms. We find these four elements in this cross. We see also the symbol of these elements. The symbol of water is the triangle. Δ It is represented by G. The air is represented by the triangle with is shown as R. The symbol of the fire is the triangle with its point to the top and is represented by A. Δ The symbol of the earth is the triangle with a line across. Δ It is represented by T.

The Boustrophedon writing is a symbol of the black race. (Bull Age). In opposition to it we find the writing of the Mongol, the Chinese race. (It was in the time of the Scorpio and The Semitic is the Lion age and the Occidental, the Aquarian age, (to know, to will to dare and to keep silence.)

What is the conception of the macrocosm? What is the Zodiac?

There are different conceptions about the beginning of the Universe. According to astronomy, in the beginning there was a big mass of fire. From this fire sprang out sparks of itself due to movement. This turned round, and little by little it cooled down. This is the origin of the planets and the stars moving round the sun which is in the centre of our universe. Around it we can see a Heracy which makes a revolution round the sun in 28 days. The Venus makes a round in 224 days, the Earth in 365 days, the Mars in 687 days, Jupiter 11 years, Saturn in 30 years, Uranus in 84 years, Neptune in 164 years, and then Pluto the last planet of our Sun system, in 248 years. So, round the Sun these planets revolve or satellites like the moon of the earth. The moon takes 28 days to make a round of our world. Some planets have more than one moon, for instance Uranus have 5 moons, Jupiter 5, Mars 2, Saturn 10, Neptune one moon so big.

A "constellation" means an amalgamation of stars. Thousands of stars make one constellation. There are many constellations in the universe, but there are 12 constellations more important to us than the others. They are, Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricornus, Aquarius, Pisces. The signs are, ram, bull, twine, crab, lion, always revolving round the Planets are
virgin, balance or scales, scorpion, archer, capricorn or goat, water career and fishes. These 12 constellations make the Zodiac. "Zodiac" means animal round.

We know that the sun is the centre of the universe. When the earth goes round the sun it appears that the sun goes round the earth. So when we say that the sun is in the Virgo, we understand that the earth is in the Aquarius. If we look from the centre of the universe (the Sun) then we look in the heliocentric way, and if we look from this planet, it is in the geocentric way.

In this planet our Earth 7 parts are composed of water and 3 of earth. There are 4 elements and 3 times 4 elements makes 12 sign of the Zodiac.

The Doctor then went on explaining the Chakras and the interconnections with the Zodiac, etc.
Astrology has for its basis mathematics and philosophy. Mathematics are required for astronomical purposes. By "astronomy", we mean the study of the stars and the planets so far as density, speed, orbit, etc. are concerned. By learning philosophy we know the difference between macrocosm and microcosm, the purpose of life, where we come from and where we are going, and, with the help of astrology, we are able to know exactly what is going to happen to a particular man, what has happened to him, and why.

Astrology has now been recognized as an important science in the Western countries. When a student has finished his course in the higher mathematics, he is usually taken on to the study of astrology, which is a deeper science. At present some Universities are giving Diplomary for passing in Astrology. Astrology is, therefore, not a science to be learned in a few months or a few years. I shall, now, try and give you a general idea of the subject today.

First of all, there is the Sun which is the centre of our Universe. You must know that in mathematics and physics, we have certain signs to represent certain things. For instance when we want to refer to gold or silver, we refer to them by certain definite signs. In the same way, the planets and the constellations which go round our Sun are represented by certain signs. These all astrologers know.

The distance of the planets from the Sun is approximately as follows. The figures represent the distance in million kilometres.

- Mercury - 58; Venus - 97; Earth - 150; Mars - 395; Jupiter - Saturn 1 million 240; Uranus - 2 mil. 840; Neptune - 4 mil. 300; Pluto - 6 mil. 170.

During the olden days, there were no telescopes, and hence they were able to observe the planets with their naked eyes only. In they were able to observe only the Sun, Mercury, Venus, Mars, Jupiter and Saturn. Only the initiates were able to see. They were even able to reveal the existence of the 12 constellations known as the Zodiac. With the aid, however, of scientific apparatus, people have seen the other stars beyond the Sun. Uranus which is 2 million 800 million kilometres away from the Sun was discovered by Herschell in the year 1781. Neptune was discovered in 1846 by a French Astronomer, LEVUMEN, and Pluto was discovered in the year 1930 from an American Observatory by (LOVUXX).

Between the Sun and HERCES there is a meteorite known as Vulco. Though it is not yet recognized by Science, yet the people know of the existence at one time of a planet called the "Vulco" (VULCA)."
Beyond these Asteroids exist the 4 big moons known as the "GALILEA-MOONS". Further on is the Jupiter with 5 satellites which sometimes can be seen. Then there are the Saturn with 13 satellites and the Uranus with 14 (One being discovered recently). The Neptune has one satellite which is as big as our earth. Then finally comes the Pluto the last planet that we have discovered.

It takes 8 minutes for the light from the Sun to reach our Earth. We therefore calculate the speed of light to be 330,000 kilometres per second. Calculating at this rate, we find the light takes 3 years and 6 months to reach the Wolf Star No. 425 (34 Trillions 796 Million -Km). It must be noted here that our Sun with the 12 planets and 22,000,000 Stars makes our Universe - System. There are many such Systems. We have catalogued some 2,000 galaxies and 275 Thousand different systems. How big is this Universe? And yet, man thinks no end of himself!

Coming back to the distance from the Suns of other systems, we know that the light of our Sun would take 9 years to reach Sirius, 15 years to Altair, 26 years to Vega, 41 years to Acturus, 57 years to Aldebaran, & 368 years to Antares; 35 million Stars composed the Milky Way and it takes 85,000 years light speed to go from one end of the Milky Way to the other. This is the white line that we see in the sky. And then there is the Andromeda Triangle that is 250,000,000 Light Years away from the Earth. Then we have other Constellations (HYDRA). This gives you a very vague idea of what Astronomy is. We have to know all this before we study Astrology.

These different stars, these different Planets have their own vibrations, their own magnetism, and we are all affected by them. There are different materials, some attractive and some repulsive. This is known in physics and biology. We know we are composed of different materials, and, when we have too much of one material and very little of another, we know that we are physically or psychologically defective.

What we call "Karma" in oriental philosophy can be said to be the result of the influence of the different stars and Planets. In fact, Karma can be easily understood by a student of Astrology. By long study and observation, the Scientists of old found that when one star or planet is in conjunction with another, it brings good or bad results. So is the case when they are in opposition or in other aspects (Quintile, square, triangle, etc.)

The planets travel in their own orbits, but sometimes there is an incursion, we know that the Mars made such incursion in 1914 when it was very close to the earth. The consequence was the World War of 1914-18. Similarly in August 1839, the same phenomenon appeared. The result was World War II.

The Mars is composed of certain metals that are injurious to the nerves of the human beings. Hence when there is an influence upon the Earth we find the people excited, every little incident makes the people fight and differences of opinion makes them come into conflict.

If the Mars can give us wars and excitements, Venus and Mercury can give us Peace. So, when Mercury and Venus are in conjunction, we can say exactly that there is going to be peace. In the same way different planets have different influences upon the earth. In short we can say the Sun gives us vitality; Mercury intellectual and equilibrium; Venus gives us love, sympathy affection and art; Mars gives the fighting spirit, Jupiter gives personality and wealth; Saturn gives knowledge and meditation and also difficulties. The Sun is the King of all the Planets, and her influence is there when there are volcanic eruptions and earthquakes. The Jupiter gives us occult and psychic powers and gives us sea voyages. The Pluto is a new planet and we know very little about it, but we know that she is there when now
things are found inside the Earth and also when there are wars. In this connection see my article on "Astronomy of Buddhism". She is also present when there is success in Yoga practices and in psychic powers.

The Stars and the Planets affect not only the Earth as a whole, but also the lives of individual. So, by looking at the position of these, we can say what is going to happen to any human being. The star chart of an individual is called the horoscope. It comes from the word 'horoskop', meaning 'a view' or 'a seeing'. The stars are also related to our lives, and what is likely to happen in the future. In order to get a correct reading it is important to know the exact hour of birth.

There is also the influence of the Zodiac. Further on beyond the planets are the groups of stars known as the "Constellations". There are several constellations, but the most important ones are the twelve signs of the Zodiac, known as the "12 Signs of the Zodiac". They are also shown clearly in the blackboard.

As you already know, our planet is not standing straight, but is inclined about 23°. It rotates on its axis once in 24 hours. It is for this reason that we see the Sun in the sky in the morning and in the west in the evening. Though it appears that the Sun is moving, as I have explained, it is actually the Earth that is rotating on its axis.

The Sun is in the center of our Universe, and our Earth, like our other planets and constellations, goes round the Sun, on its own orbit. That means that when the Earth has made one rotation in 24 hours, we call a day. It also has moved one degree on its orbit round the Sun, because the Earth takes 365 1/4 days to revolve round the Sun.

This orbit of the Earth comes under the influence of the 12 constellations. On the 21st March she enters the Aries; on the 22nd April she enters the Taurus; on the 22nd May, the Gemini; on the 22nd June, the Cancer; on the 22nd July the Leo; on the 22nd August, the Virgin; on the 22nd September the Libra; on the 22nd October the Scorpio; on the 22nd November the Sagittarius, on the 22nd December the Capricornus, and on the 22nd February the Pisces.

The Earth makes one round of the Zodiac in one year. While making this round, other planets are at various distances, because their orbits are different. Mercury takes 26 days to go round the Sun, the Venus 266 days, our Planet 286 days, the Mars 687 days, the Mercury 11 years 315 days, the Saturn 29 years 157 days, Uranus 84 years 6 days, Neptune 164 years 531 days, and Pluto 248 years. These different aspects influence the life of man. Hence by looking at the position of the stars and the planets at the present time and their position at the time of birth, we can say what is going to happen to any individual.

We see here the working of the law of cause and effect. We are the result of the influence of the various stars and planets. We are, as it were, limited in our lives by the forces outside our control. For instance, when a man is born in the sign of Aries with Mars in good aspect, we know that he will be possessed of good strength and also a taste for fighting; but on the other hand if he has Cancer as strong aspect, he will be strong yet passive.

To believe in Karma is to believe in astrology. A man who is good will be born under the good influence of the Stars and a man who is bad under bad influences. To work out any particular Karma, he will be born under that particular constellation that is favourable to him for the purpose. In this way he will have to be born again and again under different constellations till such time as he is strong enough to counteract their influence.
The parts of the body are also governed by different signs of the Zodiac. The head is governed by Aries, the neck by Taurus, the stomach by Cancer, the back side & heart by Leo, the intestines by Virgo, the kidneys by Libra, the sexual organs by Scorpion, the thighs by Sagittarius, the knees by Capricornus, the legs by Aquarius and the feet by Pisces.

If each part of our body is governed by a sign of the Zodiac, we must realize the limitations of ourselves. Yet, as I have said, we can overcome the evil effects by our own effort of the will and by careful living. We can even transmute evil effects to good purposes if we understand how to do it. Astrology, therefore, teaches us that though the Stars give us some predispositions, yet we can counteract them if we wish to do so. We already know that when Mars is near the Earth, there is likely to be a war. It is true that the influence of this planet infuses the people with thoughts of ill will and strife, but if people realize the futility of war, if they are bent on bringing about peace, if they work for brotherhood, then the war that could otherwise have occurred would be avoided. You must, however, understand that co-operative effort is necessary to counter the influence of Mars.

In other words, if the balance weighs heavily towards spiritualism, the currents of materialism could be retarded.

It all comes to this that though the body is limited to the influence of the stars, the spirit is not, because spirit soars higher than the Zodiac. It is in the psychological plane. So long as we live in the physical and emotional plane, we are subject to the limitations of karma and the astrological influences. Once we rise up above the mental plane, we are in the absolute plane where the law of karma and the influence of the stars and the planets can lay no hold on us.
Mixed Class: College & School of Initiation. March 22nd 1921:

17 24 12 8 13
21 1 5 7 14 16
4 6 13 20 22
11 1 19 21 3 10
11 18 25 2 9

To make a Magic Square, start with figure 1 in the center of the top line. Move in a diagonal direction upward towards the right. Since there is no line above, imagine the bottom line raised thus:

17 24 12 8 13 17 10 11 18 25 2 9

Continue this diagonal movement until there is no line remaining to the right. Now imagine the left hand line placed to the right thus:

17 10 11 18 25 2 9 15 17

From this we can go on to find the place for 2. Repeat to place 16 23 figure 5. Since the next square is occupied by figure 1, we must 22 4 place the 6 immediately below the 5. Continue diagonally to the 3 10 right, placing 7, 8, 9, and 10. Since the next square is occupied by 9 11 6, drop below as usual for the 11. Continue.

Thus there are three rules:

a. When in the top line of the square, imagine the lowest line placed on top and continue.
b. When in the last column, imagine the first column placed last and continue.
c. When there is no vacant square, write the next number directly under.

The Magic Squares:

The Square of Saturn: 3 x 3

According to the knowledge of Correspondences, everything is under an Aspect, i.e.,

- Jupiter 4 x 4
dances. Everything is under an Aspect, i.e.,
- Mars 5 x 5
every prayer, religion, country, word, etc.
- Sun 2 x 2
therefore we must use the correct key.
- Venus 7 x 7
Semantic works below Aspect or Icon.
- Mercury 8 x 8
Typical Hebrew = Mars
- Moon 9 x 9
French = Venus.

The Use of the Magic Square:

Select in Holy Scriptures what we think we understand, replace with number values, and then find the true meaning.
The Koran is based on the Magic Square. The Bible is based, more or less, on the Kabalah and the Egyptian Zero.

Read the book, "LOGICA MUNDI," for the teaching of Jesus Christ. It is
the notes of the Disciples from which our New Testament is taken.

Read the "SEPHER YESIRAH" (book of Moses) on which our O.T. is based.
ref. SEPHER in Hebrew is NUMBER: SEPHR (Arabic) is zero or nothing; CHIFFRE (French) is number: CIPHER (English) is zero. ALL our figures come from ARABIA.

An interesting Study: "The Mystery of 64 and 65."

Diagram: A.

```
[Diagram A showing a magic square with numbers 4, 8, 13, 18, 25, 32, 37, 44, 51, 56, 63, 64]
```

Thus in SANSKRIT 'DEV' was of God. Now 'day' is of Devil.
Old American Mythology gave Curian as God. Now Hurricane is of Devil.
ref: CURIAN (French), Hurricane (English), being a GREAT STORM (destruction).

Prepare the Magic Square of Saturn: 10 x 10 x 3

Superimpose the pieces of Diagram A (area 64), upon those of Diagram B (area 45). Therefore 64 equals 65.

```
[Diagram B showing the magic square of Saturn with numbers 10, 13, 16, 19, 22, 25, 28, 31, 34, 37, 40, 43, 46, 49, 52, 55, 58, 61, 64]
```

Thus in SANSKRIT 'DEV' was of God. Now 'day' is of Devil.
Old American Mythology gave Curian as God. Now Hurricane is of Devil.
ref: CURIAN (French), Hurricane (English), being a great storm (destruction).
Thursday March 29th 1951.

The NEW AGE is due to the Astronomical Phenomenon, called the EQUINOCTIAL PRECESSION. Every 2160 years the SUN enters another Constellation. This causes a change of POLARITY both Geographical and in the Human Body.

The SUN in Gemini gave the Epoch of Adam and Eve. (The Twins).

The SUN in Taurus gave the Epoch of the Bull. (Asyria - the Flying Bull - Egypt - the Apie, sacred Black Bull of Memphis.)

The SUN in Aries gave the Epoch of the Lamb. (Noses back from Sial, says 'no more the Golden Calf'. Thus the Sacrifice of the Lamb.)

The SUN enters Pisces at the birth (exact) of Jesus of Nazareth, 2046. Thus the Symbol of the FISH in Christian teaching.

The SUN entered Aquarius 21st March 1948. Thus we are now in the ACUARIAN AGE. Ref. Matt. 24 v 30, The Sign of the SON of MAN is the-water-carrier. (ref. 2nd Coming of Christ).

Thus the Electro-magnetism of this New Age makes for us a New Faculty in the development of the Human Being.

The Theory of the CHAKRAS, (7 Endocrine Glands), though very old in the EAST is new in the WEST. The Glands go beyond the Physical and touch the

Psychological.

Pineal --

Thyroid ----

Thymus

Spleen

2 Adrenals

The 7 CHAKRAS have the same enumeration as the 7 Endocrine Glands. Each Gland in contact with a PLANET. It is a matter of Vibration. (see Diagram B).

Thus in this New Age we come under a New Planetary influence which gives New Possibilities.

The Two Basic Teachings in all Philosophy - YOGA and ASTROLOGY.

Yoga (YOG in Sanskrit) means UNION or identification. A Yogi never judges; he

endeavours to realise. For equilibrium between Jivatma (microcosm), and Paramatma

(macrocosm), we must be UNIVERSAL MIND, the five-pointed Star.

2. Astrology is the basic of all Mythology. The 12 Disciples and the 12 Signs of the Zodiac. The 4 Animals of Revelations and the 4 Fixed Constellations. (Leo, Bull, Scorpion, Water-carrier.) The 7 Spirits of God and the 7 Planets etc.

Each Sign has a Planet 'in residence', i.e. in vibrational harmony. Of course the Planets don't 'stay' in their Signs, but when they are there, they express themselves more harmoniously.' (see Diagram A for Constellations, Signs and Planets in Residence.

Notes on Planets in Residence:-

MERCURY has two Houses. Being the Planet of MONEY, it can afford this.

VENUS, Planet of LOVE, has everything, even two Houses.

MARS, Planet of WAR, is not liked. Thus is put out of its 2nd House, which was given to PLUTO, (discovered 1930).

SATURN lost its 2nd House to URANUS, discovered by Herschel 1781.

JUPITER lost its 2nd House to NEPTUNE, (discovered by French Astronomer, Leverrier 1846).

The FOUR important Elements we need to fight against:-

1. FIRE - temperature, (easy heat), dynamic, willing to do.

2. EARTH - Volume, (skeleton), concrete, objective, realisation of PLANS.

3. AIR - atmosphere, (lungs), helps us to go on to our Goal, though always two aspects, for and against. Note that all AIR Signs are double, i.e. $\infty \sim \infty$

4. WATER - the OBSTACLE, the Ocean, (blood). an abundant supply.

Each element is in TRINE (good aspect) with its own Signs.

Here being SYMBOLISM:-

The Microcosm and Macrocosm

in Perfect EQUILIBRIUM.

The SEAL of SOLOMON, Symbol of the WISDOM.
SECRET FANTACLES. MAGIC begins with the knowledge of PANTACLES, TALISMAN, and PERFORM.
The PANTACLE is made in a metal fit to receive the essence of the Astral Plane.
All Magic is made in the Mental or Sun-Lunar Plane. But at times there is a force we can't control, and we need a Pantacle to protect ourselves.
The last is the Pythagorean Pantacle, made from a polygon of five sides, i.e. a pentagon (pentagon).

Directions for its making:-
1. Circle with diameters crossing at O.
2. Between O and D find mid-point M.
3. With radius MA make MB.
4. " " NA " AO.
5. " " PA " AR.
6. Join 5 points as shown.

The 2nd is the Star of David, which, with additions, is the Seal of Solomon.
This is made from a Hexagon.

For protection when making Magic we need these two Pantacles:
1. In LADY thus:-(For the force returning from SATURN is terrific.)
2. Join these two Symbols by Cord, 3 Star in front, 3 " " at back.

This is the origin of the SACRULAR of the R.C. Church.
Sun-plexus = 5 points.
Sacred PLEXUS = 6 points.

Special Room in the Sanctuary:-
A: - Wardrobe
B: - Protection Circle
C: - Little table with Instruments: sword stick etc.
E: - Aler
F: - Table
G: - Chair

The Wardrobe holds the different coloured cloths, for the Magic of each day:
Black Magic - Black
White " " White
Blood " " Red
Healing " " Green etc.

At the Table and Chair he makes his Pentacle, Incantation, Incense.

THE ALTAR+-
A: - Alter Stone
B: - Candle (Fire)
C: - Crystal (Water)
D: - Incense (Air)
E: - Relic (Earth)
F: - Seal of Solomon (embroidered in Red and Black)
G: - Colour of Cloth changed for the Magic required
H: - Drawing in China ink (black and red) from elementary Seal of Solomon, with Alchemic Symbol (enlarged in Diagram 2) in centre.

Diagram Y: This shows position of elements on the Alter. Note that FIRE is doubled. When FIRE is doubled the Magic is only for materialistic things: is 2, 3, 6, 8, 10, etc.
For Spiritual things then only 1, 5, 6, 7, 9 etc. For bigger ceremonies.

Diagram Z:
Friday April 6th 1931.

The Kabbalistic Point (Hachor = Punctuation):- After the taking of Babylon, this was introduced for a better understanding of the teaching. The vowel comes under the letter thus:-

The Rabbinc (Divine) Square. Feel the meaning of ELOHIM (God).

<table>
<thead>
<tr>
<th>Rabbinc</th>
<th>From this ELOHIM comes the mixture of the letters.</th>
<th>The numeric value of each letter.</th>
<th>Take the tenth part of these values.</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAMIH</td>
<td>30. 1.40.10. 5 3 1 4 15</td>
<td></td>
<td></td>
</tr>
<tr>
<td>AMIHL</td>
<td>40.10. 5.30. 1 4 1 5 3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>MIHLA</td>
<td>10. 5.30. 1.40 1 5 3 1</td>
<td></td>
<td></td>
</tr>
<tr>
<td>HILAM</td>
<td>5.30. 1.40.10 5 3 1 4</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Note the first line in Chart 3. The figures read 31415. Now 31415 is PI. If we know that ELOHIM is the Creator of the Universe, and since the Symbol of the Universe is a Circle, and it takes PI to make a geometrical circle, then here is a parallel between the Microcosm (Microprosopos), PI, and the Macrocosm (Macroprosopos), ELOHIM.

The Microprosopos includes the Divine Name, ELOHIM, or more correctly, Elohim, so in the letter under the vowel, is the circumference of the circle. In the Hebrew letters the vowel is under the letter "I", as in the word "temple". It is the circumference of the circle.

Kabbalah - Microprosopos Macroprosopos 2 mothers
Hieroglyph - Man, Eagle, Bull, Lion
Alchemy - Subtil, Thickness: Volatile, Absolute
Occultion - Sulphs, Ondines, Gnomes, Salamanders

Exclamation: In Macrocosm we have MICROPROSOP (Little Face), and MICROPROSOP (Great Face of God). Thus the Microprosopos and the Macroprosopos are the two mothers of the Universe, one black, one white. Thus in reality, we are God and a reflection of God. Thus we are GYM (illusion). A candle in a room is reflected in every bottle on the shelf. We are as the reflection in the bottle, we are not there!

In Hieroglyph we find the "Four Fixed Constellations", the four Evangelists, the four faces of the Sphinx; the four Races.

The Anticent Religion there are the Four Elements, Air, Water, Earth, Fire.

In Alchemy there is Subtil, Thickness, Volatile, Absolute, the four elements of the Alchemists.

In Philosophy there are Spirit, Matter, Movement and Rest, the four elements of the Philosopher.

In Occultion there are the Sulphs, Ondines, Gnomes and Salamanders.

To Remember and Meditate: -

INRI - Jesus of Nazareth, King of the Jews. By Fire one can change the complete nature. Each letter comes on one point of the Cross. The Name of the Eternal Form of the Divine.

I E V E - Jehovah: same meaning as INRI. There are four Polarities: the Divine Name, when He is Creator, just before He is Elohim, He is no more the Absolute, but He is about to manifest itself. The manifestation is in the Christian Doctrine.

ROTH - The same. The TORA of the Hebrew, the TAR of the Egyptian, ROT the Divine Speaking, OTK etc.

In Alchemy there are three Symbols:

Sulphur (Spirit) Mercury (Wisdom) Salt

<table>
<thead>
<tr>
<th>Male</th>
<th>Female</th>
<th>Neutral</th>
<th>Shell (of Egg)</th>
<th>Volatile (of Metal)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yellow</td>
<td>White</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

There are not the physical minerals, but the IDEIA, i.e. Philosophical Minerals.

SUL-TUR is the Spirit, Subtil of Force, Prana.

MERCURY is Hermes of the Mysteries, in every thing, in these three, it twas the Plastic Matter between the two is the Messenger of the Gods.
The Salt is the Wisdom of the Spirit. ref. Ye are the Salt of the Earth.

MUTT, FEMALE, NEUTRAL is not of Sex, but of REALITY, a Vibration, a Principle.

The Colour of the EGG: Yellow is the Sulphur Element, Male, positive vibration of the Spirit of the Egg. The White is Mercury, Female. (Note: in the physical egg, the White is Albumen, the salt.) The Shell is the Universal, Lead, Salt.

Note: The Egg (Aura) is a great Symbol with a great meaning.

A question to ponder: Which came first, the egg or chicken?

In the Metal (Alchemy principle), the Sun is Mercury, the Body is Venus, and the Volatile is Salt. Each Metal has three particles, and with the density of each metal, we know exactly what to do.

In GOLD, the Mercury and Sulphur are PURE and FIXED.

IN GOLD, Mercury and Sulphur are both PURE and both almost FIXED.

In HON, Mercury is IMPURE and FIXED, Sulphur is IMPURE and not FIXED.

In LEAD, Mercury and Sulphur are both IMPURE and both VOLATILE.

In COPPER, Mercury and Sulphur are both IMPURE and IMPURE.

Here is another combination.

Lesson for next week:
Find other methods to make 35. There are not more than 86 methods.

EVOLUTION

We are not to think in terms of EVOLUTION of a powerful Chemical Agent, a less developed Element, and only a point reaching the Divine.

But God in the Universe, makes His Temple from above, i.e., INVOLUTION. Here, a big base of the Divine reaches down to a lesser Astral, and there is only a small development in the Physical.

Thus the Perfect Balance between Microcosm, and Macrocosm. (Equilibrium)

To reach the Divine, oppose Spirit to Matter and then with movement and rest, get Balance.

INVOLUTION

Reservable side Earth and Water.

EVOLUTION

Positive side Fire and Air.

With the Fire of MUNDANITY rising, and the Air of FRANKENSTEIN, (i.e., Aineko Sushumna), we make our evolution go on. Therefore, try to build over the little PHYSICAL body, a powerful ASTRAL force. Rising to the universal Consecration, forget the first inspiration of the Individuality, (in small brick), and lose the self in the ABSOLUTE.
The Magic of Wisdom
The symbol of YANG is ——. The symbol of YIN is ——. Thus we symbolize Heaven as perfect, positive, objective, ——. On the other hand Earth is three times YIN is ——.

Disease comes from excessive polarity if YIN. Thus in Chinese medicine they puncture with needles to infused cold or silver, YANG or YIN according to need. From these 5 combinations they make a system of Astrology. In this way they have only 5 Signs instead of 12. Th. 8 KOUAS can make 64 combinations.

In the Chinese Dictionary there are no ABC, but different roots. The numbers 1, 2, 3, etc., at the side agree with the Hebrew alphabet, in numeric value only. The Hebrew alphabet is the base and the Chinese is closed with it. In Occultism, these 16 roots are the important and interesting ones. (Ref. the writing, "The Tao of the King", by Loo-Tao.)

CHART 2.

1. A. Jin 2. T. Kieu 3. L. Hou

10. 1 Cheou 17. 1 Kheou

12. 1 Yu 19. 1 Kin

13. 1 Theau 20. 1 So

14. 1 Young 22. 1 Chi

15. 1 Kieou 16. 1 Hou

CHART 3. The Signature of Solomon (A), and the Seal Of Solomon (B). This is called the A. KOUAS of Solomon, (Ref. similarity to the collarbone, clavicle). This gives the instruction of the Holy Traditions of the Hebrews, (the Kabbalah). The picture in A is the plan of the galleries of the Temple, and gives the direction. The 4 Hebrew letters are ——, Sin, Neteh, Seth, Lamed. Note: The feet of each
The Magic of Wisdom

letter are turned to the centre of the circle. (Note the corruption of the form of Beth).

In the Magic Ceremony they usually employ this PARADICE, the CHLORICule of Solomon. It is a neutral PARADICE, and, made in lead, it always a protection against everything, especially against thunder and evil spirits.

The T (Tau), in the centre is an Egyptian symbol of Initiation. It is the last letter of the Thletem alphabet, and thus, in the Temples of Atlantis, it is the Symbol of the last step of Initiation.

In Egypt, the T (Turin), was used at the last meal, to prevent the infiltration of the initiated who failed at the last password. Thus, in Freemasonry, the use of the Banner to eliminate the initiated.

Christ on the Tau, the power on the Horus Cross, etc. It was His last Initiation, hence the Tau. (Note:- the Hand of Christ appears to shape the Horus Cross.)

The Reversed Cross (Christian Kabalisit), take the Tau as their Symbol. The Tau is also a Symbol of the two polarities, of the two numbers of Heaven and Earth. In the Bible "Cross and Multiply" is a Key.

Ref. the four readings of a number:-

Thursday, April 12th 1951. (continued) Page 2.

Individuality, and reach the Goal of IAAHIS (i.e. by prayer, no need of friendship; Church ceremonial; incense, which kills the faculty of Reason, song etc.)

After IAAHIS comes the beginning of EVOLUTION, for with Religion, we become YAH, we start the Path the Tau.

ILLUSTRATION:- We forget the Personality, in sublimation by Love and Faith. Illumination is a state of Auto-suggestion.

KNOWLEDGE gives Psychic Power, the Synthesis of the Thesis and Antithesis. Knowledge of the visible and invisible worlds. 1 + 5 is not 6; it is 6. For 5 is made by 1, 2, 3, 4, 5. This makes 15 which is 1 plus 5 = 6.

In the School of Wisdom, the Knowledge of the Secret Knowledge. Religion, through the Arcas, in the preservation of the Secret Knowledge. When we are Initiates, we are master of the two principles, reason and intuition, positive and negative.

At INITIATION we reach the Plane of the ARCHETYPE. Thus on to the CHRISTIC Plane, and to ENTHROPHOLIC.

Note:- Initiation is the first step for the blind in Yurian Dreams. (Ref. Illusion, which is only a sublimation of the IAAHIS; it is not contact with the real, etc.)

After people go beyond to the CHRISTIC Plane, they may come back to show the Key to be sincere. After this comes ENTHROPHOLIC, the FUSION in the INHABITED.- NUMA.

Thus INHABITED into Master, and ENTHROPHOLIC into the SOUL.ALL.

This is the base of all teaching of the School of Wisdom. This is the Invisible Teaching, the 1, 2, 3, 4, over which we construct the Visible.

This is all the way up to the Path:

1. Pratistic (positive, rational, discipline, faith) very difficult.
2. Knowledge (positive, objective, understanding, knowing) but there comes a time when we can't go on. We need the 2 Polarities. The Synthesis of the two.

The Magic of Wisdom

www.sergeraynauddelaferriere.net

The Two Great Types of Civilization in History:

1. CONTEMPORARY AND MODERN
   a. This type is characterized by a high degree of organization and advancement in science and technology.
   b. The major institutions include governments, educational systems, and industrial complexes.

2. ANCIENT AND MEDIEVAL
   a. This type is characterized by a high degree of religious or spiritual influence and a focus on tradition.
   b. The major institutions include religious orders, monasteries, and feudal systems.

The Return of Ancient Wisdom in Modern Times:

1. bounce: ancient knowledge into modern applications.
2. blend: ancient wisdom with modern science.

The Five Great Principles of Civilization:

1. SUPREME RULE: The highest form of government.
2. RELIGIOUS: based on spiritual beliefs.
3. MILITARY: based on force and power.
4. ECONOMIC: based on wealth and resources.
5. SOCIAL: based on community and cooperation.

Note: If working from dates before the year given in last column, take 'given Time' as true Local Time.

Note: If working from dates before the year given in last column, take 'given Time' as true Local Time.
The seven Endocrine Glands form the fundamental basis of the Human Being. From these seven Glands emanate the seven Chakras. These are the basis of the Spiritual Life of Man. The location of the Glands and the Chakras coincide. The health of the Body depends upon the harmonious vibration of the Glands. But since the Glands are in vibrational harmony with the Planets, these Planets affect our lives. Thus the importance of the Study of Astrology. If then, a certain Planet is in an aspect with, we get a corresponding resonance in the Body. The great Functions of the Body, Locotion, Procreation, Excretion, Reproduction, Speech, are spiritual. Depends upon the harmonious vibration of the Planet linked with them.

The four Elements needed for manifestation, are also in harmonious vibration with those centres. The solidity of Earth, the Moldering quality of Water, the Energy of Fire, and the Support of Air are found in both Microcosm and in Macrocosm. The Identification of the Microcosm with the Macrocosm is YOGA. Conquering the four Elements, we rise to the more subtle Ether, and from there to the Mental Plane, where, no longer limited by the four Elements, we achieve Clairvoyance. On reaching the Absolute, we gain enlightenment in the Universal Consciousness, and there is no more limitation. Thus the importance of YOGA, at the base of the spine, in the Sacrum, is the Abode of Bliss, with its Stations, Suburbs, the Fluids Column, through which is destined to pass Kundalini, the great inner power. Kundalini, symbolised by the Serpent, in the little cup of the Sushumna Column, but awaits the aid of awakening.

The ASIA of the transmutation from the Serpent to the Eagle, the coming of BRAHMA-YOGA, the Reincarnation in Universal Consciousness.
Friday, 11th May, 1951. 
Cremorne.

Autumnal Equinox, 22nd September.

Winter Solstice 22nd December.

Vernal Equinox, 21st March.

Sun takes 365 days . . average 1 degree of an day.
Therefore 30 degrees each Sign . . Ref. Sun Sign each Month.

The precession of the Equinox: caused by Nutation of Earth.

The Sun loses 1 degree each 72 years.
Therefore The Sun loses 30 degrees (one Sign), each 2,160 years.
Therefore The Sun " 360 " (full Zodiac) " 25,920 "
Thus we get the Epochs or Arches.

Hence the Aquarian Age; the Golden Age;
the Age of The Sign of the Son of Man.
The Secret Teachings now open to all.

2. The Birth of Christ, the Sun entered the Sign of Pisces, the Fish. (Initiate)
The Waters of the Earth were explored.

5. The Sun in Gemini, (The Twins). The Epoch of Adam and Eve. The two polarities.

(b) Circle of Darkness Subjectivity Religion

---

**INITIATIONS**

4th. (Central). THE INSTRUCTORS OF THE WORLD.

HILL OF MOUNTAINS (EX. IV: 3 - 4) Transmutation from MATERIAL TO SPIRIT.

**IN HOC SIGNO VINCES** (By This Sign We Conquer) In Vibration The MAGIC POWER EXISTS.

---

**RECIPE**

1. **CHESTY LEEK:**
   1 Small Cup Thistle Broth.
   1/4 Cups Liquid Celery.
   Little Parsley, cut fine.
   A Cup Ground Tuts.
   1 Large Onion, cut fine.
   Add 2 well beaten eggs.
   1 Teaspoon Butter.
   Pinch Allspice.
   1/3 Cups Milk.

   Mix well and stand for 20 minutes. Bake in moderate oven for 30 mins. (When in oven 20 mins., grate considerable amount of cheese over top and cook for the remaining 10 mins.) Serve with vegetarian gravy.

2. **STOCK FOR VEGETARIAN SOUP:**
   1 Handful Eren to 2 Pints of Water.
   Simmer gently for 2 hours and strain.

   Note: 1 stick of celery, including tops chopped fine can be added, and if this is cooked without salt, it makes an ideal beverage for people suffering with rheumatism or arthritis.
The above chart depicts the Traditional Planets of Antiquity which appear in our Solar System. Dealing with them in their order of proximity to the Sun, they appear as follows:

**THE TERRESTRIAL PLANETS.**

1. **Mars:** Diameter, 3,000 miles. Distance from the Sun, 142,984,000 miles. Time taken to make a complete revolution of the Sun, 687 days. Mars is named thus because of its position to the Sun, and because it is clouded by the brilliancy of the Sun, it is rarely seen, except under exceptional circumstances.

2. **Venus:** Diameter, 7,700 miles. Distance from the Sun, 67,900,000 miles. Time taken to make a complete revolution of the Sun, 224 days. Venus, known for her silvery splendour is about the same size as our Earth, and is often seen in conjunction with the Sun because it is near enough to be in conjunction, and yet far enough away not to be clouded out and therefore can be seen. Mars is sometimes seen in its nearest approach to the Sun and never leaves it.
3. Earth: This being the Planet on which we reside, we are not dealing extensively with it, because for the purposes of Astrology we are interested in the construction and particularly the effects of the other Planets of the Solar System in relation to the Earth.

4. Mars: Diameter, 4,220 miles. Distance from the Sun, 141,000,000 miles. Time taken to make a complete revolution of the Sun, 687 days. It is recorded that this Planet is much smaller than our Earth.

**THESE FOUR PLANETS ARE KNOWN AS THE TERRESTRIAL PLANETS.**

After these come the Asteroids at a distance of 280,000,000 miles. Little is known about them, though it is generally believed that they belong to each other and also to the Sun. It can be seen that they are at a much further distance from the Sun than the Terrestrial Group.

5. Jupiter: Diameter, 87,000 miles. Distance from the Sun, 483,000,000 miles. Time taken to make a complete revolution of the Sun, 11.8 years. This is an enormous Planet, and is referred to as the Giant Planet of our Solar System. It is attended by a number of Moons said to be as large as Mercury.

6. Saturn: Diameter, 72,000 miles. Distance from the Sun, 866,000,000 miles. Time taken to make a complete revolution of the Sun, 295 years. As can be seen this Planet is a much further distance out even than Jupiter. It is a fascinating subject to Astronomers and Astrologers because of the rings that surround it, and is a most glorious Planet to be seen in our Heavens.

All the above Planets can be seen with the naked eye (under favourable conditions), the four Terrestrial Planets because of their proximity, and Jupiter and Saturn because of their size.

**THE NEW PLANETS:**

Uranus: Diameter, 32,000 miles. Distance from the Sun, 1,780,000,000 miles. Time taken to make a complete revolution of the Sun, 84 years.

Neptune: Diameter, 32,500 miles. Distance from the Sun, 2,770,000,000 miles. Time taken to make a complete revolution of the Sun, 164 years.

These two Planets are estimated to be about 5 times the size of our Earth. Pluto: Due to the very recent discovery of this Planet (1930) very little is known about it. It is estimated that it takes 248 years to make one revolution round Sun.

**CHART SHOWING POSITIONS OF Planets**

<table>

</table>

The above indicates the positions of the Planets in the respective Constellations in degrees, minutes and seconds, or in degrees and minutes only, whichever the case may be. From this the student is requested to do the following:

1. Make a chart showing the aspects on the chart.
2. Show also the aspects listed underneath the Chart (Refer to diagram 2, Lesson 25/25).
3. Show the Planets in their qualities.
4. Show the Planets in their Elements.
ANSWERS TO LESSON SET JUNE 6TH

ANSWER 1.
- ASPECTS CHARTED -

Students will note that the Planets are listed in their actual positions in the respective Constellations.

That is to say that Mercury appears in Taurus at 28.30 but her actual position in the Zodiac commencing from the Constellation Aries is 58.30. Mars is actually 72.33 and so on.

By referring to Mr. Hick's lesson of May 25th, students will note that Planets are listed in their total number of degrees and minutes according to their positions in the Zodiac.

Either method is correct.

ANSWER 2.

<table>
<thead>
<tr>
<th>TABLE OF ASPECTS</th>

ANSWER 3.
- PLANETS IN THE ELEMENTS -

\[
\begin{align*}
\boxed{4} & \boxed{9} \\
\boxed{3} & \boxed{10}
\end{align*}
\]

- PLANETS IN THE QUALITIES -

\[
\begin{align*}
\text{CARDINAL:} & \boxed{4} \boxed{9} \\
\text{FIXED:} & \boxed{3} \boxed{10} \\
\text{MOBILE:} & \boxed{1} \boxed{2}
\end{align*}
\]

From this Ephemeris the student is asked to submit Answers 1, 2, 3 and 4 as a result of his or her findings.

(Cont'd Page 2)
### Miss Kepel's Advice

Miss Kepel advises to list Planets in their order of Velocity both across the top and down the side. By adopting this method, the student calculates all the aspects of the Planets in their respective order. Section 1 lists all the aspects of the Moon. Section 2 lists aspects of Mercury and so on throughout the table.

However, this is purely optional as both methods are correct and give the same answer in the final listing.

**Notes and Comments**

- Miss Kepel's list is not mentioned in the notes section of the document.
- The table includes columns for O, O, O, O, O + O + O, and O, O, O, O, O + O + O with corresponding numbers.
- The table seems to be part of a larger document related to astrology or celestial navigation, given the reference to Planets and Velocity.
The diagram indicates the Involution of the Divine to Man and the Evolution of Man to the Divine.

In reality the Great Divine (Fig.6) has brought us into manifestation from His eternal power house - All Power, Consciousness. There is an inclination on the part of Man to forget that the Spiritual is the real thing, and to over emphasize the importance of the physical body. Fig. 1 shows the comparative value of the physical body which corresponds with Sahasrara-Chakra. Fig. 2 shows the value placed by Man on the physical body, whilst Fig. 3 denotes the Astral Body (aura surrounding the physical body), which corresponds with Sahasrara Chakra. It will be seen that the actual value of the Astral body is far greater than the actual physical body. The Astral body is the important body to the Divine because the Divine pours down through the Astral body for manifestation in the physical. (This body is called Astral because it shines so beautifully, the word 'Astral' meaning Star.) According to the development of the individual, so is the corresponding manifestation of the Astral Body.

Fig. 4 denotes Astral and Physical in the Divine, whilst Fig. 5 shows Man as only a point in the Divine, corresponding with Sahasrara Chakra (Man's point of origin in the Great All). ------ By means of Indicating, we draw our thoughts away from the physical manifestation and realize the eternity of the Spiritual.

TRIANGLES: Pointing downwards represents Involution, those seeking manifestation in matter - negative - (represented by the two negative symbols of Astrology, Earth and Water).

Pointing upwards represents Evolution, those making the return journey to the Divine - positive (symbolised also in Astrology by the positive symbols, Fire and Air).

The double Triangle represents the perfect balance between Macrocosm (the Big Universe) and Microcosm (the Little Universe), the equilibrium between Paratman (The Greater Self) and Jivatma (The Personal Self).

(Cont'd) Page 2.
### Levels of Consciousness

**From Nescience (Vague, Unknowing) to Omniscience (All-Knowing).**

**Emotion & Desire**

**Sensory Level** (Physical)

**Typical Mental State**

- Childish
- Butcherly Mind
- Confused Thinking
- Mental Fixation (Negative)
- Mental Concentration (Positive)
- Self-Awareness

**Typical Hindrances**

- Ignorance of External World
- Likes & Dislikes
- SELF
- SELF
- WILLS TO LIVE

**Auspicious Discipline**

- Electrical Discharge & Observation
- Occultation & Observation
- Mental Concentration & Observation
- Self-Purification & Observation
- Unconscious Salutation

1. **Sensory Level** (Primitive Man). Thoughts fixed on purely physical. No control of emotions, mind's awareness limited to animal kingdom plane. "Primitive" man becomes only being of that level in any and all parts of the world.

2. **Emotion & Desire** (Modern Sensory Type). Emotional realm in the greatest realm manifested in this world at the present time. Majority of humans beings live in their emotions. Quite a high standard, elevated from the purely physical.

3. **Lower Mind** (Modern Intellectual). Represents Humanity interested in this life as the important phase. Think in the objective sense, everything has to be seen. Some of the greatest modern brains have come from this group especially the leaders of Science.

4. **Higher Mind** (Intellect). Represents those people who are realising that this earth is not their real home, and who are turning away from this world because they want to realise the Divine, and not function only on the intellect, the emotions or the physical. These people are beginning to think for themselves, and are knocking at the door which will be opened. People of all races are drawn to this realm, reaching up into the great Intuitive Plane.

5. **Perfected Man** (A.T.H.A. Spirit). Can focus himself at any time on any plane and has complete control of all his bodies. A.T.H.A. - The Great Spiritual Plane linking with the two Chakras in the head. Reintegration in the Great All.

**Note:** The Mind has two distinct groups. Objective, concrete, seeing. Abstract: Ability to realise without concrete proof.
The above chart depicts the Regents or Rulers of the significations (those planets shown on the inside circle), and also the Subsidiary Rulers in each 10 degree sector. It is to be noted the Subsidiary Rulers are not as strong as the actual Rulers, but nevertheless their influences are quite powerful.

With regard to the Rulers, commencing from the students will note that they commence with \( \sigma \), \( \phi \), and then work out again \( \sigma \), \( \phi \) thereafter follow the larger planets, \( \gamma \) who now rules \( \eta \) in place of \( \sigma \) then followed by \( \gamma \), \( \gamma \) who rules in place of \( \eta \).

\( \phi \) denotes Force. \( \phi \) Form and Beauty. \( \gamma \) Activity. \( \gamma \) Fruition, Growth. \( \sigma \) Giver of Life, Warmth.

It is to be remembered that when the Planets are in their own signs or houses their influences are much stronger, and they are much more harmonic as they are in their own vibration.

The \( \sigma \) are not Planets in the same sense as the others.
In the earlier days of Astrology some of the Planets used to have the
Houses, but these have been replaced by the more recently discovered Plan-
et as previously mentioned. Part of the vibrational influence comes from
the signs and part from the Planets.

With regard to the above chart, students will notice the qualities
listed beside each Element. As there are 3 Qualities and 4 Elements that
mean that we have no two signs exactly alike simply because they consist
of either Fire, Earth, Air or Water. For instance Aries is Cardinal
Fire, Leo Fixed Fire, Sagittarius Mutable Fire. So that all the Elements
of Fire, Earth, Air and Water are governed by different Qualities and there-
fore have different influences. This will be observed from a study of
the above.

Cardinal denotes Strength (the 4 Cardinal Signs forming the Square
which in Astrology is an extremely powerful aspect for good or otherwise).

Fixed denotes Wisdom or Love, emotional sign, whilst Mutable means
what it implies. Cardinal.

It is also of great interest to note that these 3 different qualities
are manifested thus: Cardinal is the spiritual or Atma Plane, manifested
in the physical, denoting enthusiasm, energy. Thus we have a true Aries
type. Cardinal Fire, typified as above.

Fixed gives us our intuitive types, representing the Buddha Plane
above) and emotional Plane (below).

Mutable gives us our types absorbed in the Mental, abstract and
concrete.

---Due---

(LMrs. Moore's recipe to follow).
The Ancient Philosophers divided the concept of Heaven into twelve equal parts which they called "Houses" or "Houses" of the Heavens.

The above chart depicts the Intrinsic Interpretation of the HOUSES through which the Constellations and the Planets pass.

The 1st. House is the House entering into the Ascendant (which is the Eastern Horizon) and is very important at the time of birth for it brings the power with it.

The 7th House, the opposite side, is the Descendant and has the opposite effect - declining of power.

The Mid Heaven, 10th. House, is also very important as it forms half of the Cross, the Cross being the strongest factor in manifestation - the Symbol of Limitation. (The M.C. is the Divine Life pouring down).

The Nadir, 4th. House, forms the lower half of the Cross. Thus the 1st, 4th, 7th, and 10th. Houses form the Cross.

---
The above chart depicts the location of the Signs in the Houses for London as at 12 noon G.M.T. 22nd July, 1931.

This chart also shows the 12 Houses charted according to the English method. That is to say that by this method the Houses 1 - 12 remain fixed in the Heavens whilst the Signs and the Planets pass through the Houses.

This is actually no from the Earth point of view. Students will observe that in this manner the signs have been placed on the chart according to their location in the Heavens as given in the Table of Houses, and hence the Planets can be placed in the Signs in accordance with the Ephemeris for the Planets. (Refer to Page 2 for Ephemeris of Planets).

The four important Houses are the Ascendant (1st. House), the Descendant (7th. House), the Mid-Heaven, N.C. or Zenith (10th. House), and the Nadir or F.C. (4th. House).

The Houses 1 - 6, which we never see, are the Houses below the Horizon, whilst the Houses 7 - 12 are the Houses above.

Because of the angle of the Ecliptic, which is tremendously important and will be dealt with more fully at a later lesson, the Signs appear to shrink in the Mid-Heaven and stretch on the horizons.

(Cont’d).
Students will note that the Ascendant is listed in two figures, 21.11, this being because it is most important.

**Method for Locating Houses:**
- Asc. is 21.11 of Libra therefore -
- Desc. which is the 7th House is exactly opposite and must be 21.11 of Aries.
- The 10th House being 28 of Cancer, its opposite, the 4th House must be 28 of Capricorn. From this students will define how to locate the other houses.

**Chart 2.** The above Chart shows the method adopted by Dr. de la Ferriere. By this method we regard the Signs as fixed (thereby retaining them in their familiar positions), and comparing with the Ascendant, locate the four points, (houses 1, 7, 10 and 4). Proceed then to locate the remaining Houses.

The Rising Sign is that sign rising out of the 1st House.

Students are requested to do the following, using Dr. de la Ferriere's method,

1. Chart Houses (as per Table of Houses, Page 1.)
2. Chart Impacts (as per Almanac for Planets, Page 2)

**Ephemeris of Planets Places**

</table>
The chart below, depicting the world, illustrates the angle from which we see the Heavens. Bearing in mind that man, standing with his feet on earth looks out to the Sun, students will observe that the angle at which one sees the London skies is much greater than the angle at Bouvet Island.

Therefore, the Houses for London (51° N) and Bouvet Is. (51° S) are not the same because of the angle. This is further illustrated by comparing the London & Bouvet Island Charts below, both depicted for 21st. June, 12 noon. The Houses for London are more expensive in the Mid-Heaven, whilst the Houses for Bouvet Is. are more expensive on the horizons.

To locate the Houses for Bouvet Island it is necessary to add 12 hours (Bouvet Is. being in the Southern Hemisphere) and refer to Table of Houses, London. Then invert the Houses.

**ANGLES:** At the moment the Sun is in Long 0° it is 12 noon. The distortion of the Houses in the north and south is much greater than in the tropics.

Observe also long day in the North Pole and short day in the South Pole.

**STUDY:** Chart Houses for London and Bouvet Is. as at 7/10/51.

Siderial Time 21st. June 5hrs. 57 mins. 16 secs. For South S.T. add 12 hrs.

Noreest: "Table: Land. S " 55 " 38 " Thence: SST for Bouvet Is.

Error: 4 min. 32 sec.
VARYING THE LATITUDE.

For Students to be able to chart the Heavens for any part of the World, it is essential to understand how to vary the longitude, the reason being that Evelyn's Ephemeris from which we derive our calculations lists the Tables of Houses for London, Liverpool and New York only.

The foregoing charts illustrate the Heavens charted for New York, Copenhagen, Falkland Is. and Lucknow.

Friday, 12th. October.

The method used for varying the longitude is as follows.

Sidereal Day is 4 mins shorter than the Solar Day, therefore we reach Sidereal Noon (which is 5 hrs 0 min) before Solar Noon.

(Solar Noon moves because the sun and earth move round the Zodiac, Sidereal Noon remains fixed).

Therefore - if 360 deg. takes 4 mins.
90 " " 1 "
15 " " 10 secs.

RULE FOR CALCULATION, is as follows:

Locations West of Greenwich. Plus 10 secs for each 15 deg.
East " " Minus " " 15 "

REMEMBER AS GIVEN CHART 1 -

Sidereal Time 12th. October 1751 was 13 hrs. 21 mins. 11 secs.

Longitude for New York is 74 deg. 74 divided by 15 degrees equals 5 degrees. 1 sec for each 5 degrees equals 6 sec and because the location is West, ADD and that gives 13 hrs. 21 mins. 51 sec. Refer to Table of Houses, New York and nearest Sidereal Time is 13 hrs. 21 mins.

Giving an error of 31 secs which would have nil effect on calculations.

From this Sidereal Time students will find Houses 11, 11, 12, 13 etc. 2, 3 supplied in the Table and chart the Heavens accordingly.

Refer to Chart for Falkland Is. and following the same plan remember else to ADD 12 hours for South Sidereal Time, Falkland Is. being Lat. 62 S.

Copenhagen and Auckland Charts illustrate the longitude calculations subtracted, these cities being East of Greenwich. Having calculated nearest Sidereal Time for respective locations refer to the Table of Houses whose Latitude is nearest the latitude of that particular location being charted.

---000---
The above chart depicts the Sidereal Clock in relation to the Zodiac, hours being 1-24. (Notice there are no A.M. or P.M. in Sidereal Time). We work from Sidereal noon to Sidereal noon.

The Zodiac being 360 degrees, divide the 24 hours into 360 degrees and it equals 15 degrees. Therefore, if 1 hour equals 15 degrees, each sign being 30 degrees equals 2 hours.

At the moment that our Sun is Long 0 it is 12 noon and at the moment the Sun is 0 of Aries it is Sidereal Noon. As illustrated in the above chart the Sun in relation to our Earth is at Long 0 and in relation to the Zodiac is Aries 0. Therefore we have Solar Noon and Sidereal Noon at the identical moment.

(Cont'd overleaf)

Note: If students cut out these two illustrations they can be used as demonstrated by Miss Nagel, to show how the Sun in its movement round the Zodiac is always 4 mins. or 1 degree ahead of the Earth in relation to their respective positions in the Zodiac.
THE BASIS FOR CORRECTION FOR HOUR OF THE DAY (Contd).

However, because of the tilt of our Earth on its axis, as it revolves around the Sun in less 1 deg in 24 hours and also 4 mins in 24 hours, or, using our Astronomical terms, the Sun moves 1 deg. in 24 hours and also 4 mins in 24 hours.

Therefore 4 mins in 24 hours equals 1/6th. min or 10 seconds in 1 hour.

Consequently, then stating the Heavens for any hour of the day, the Basis of Correction for Hour of the Day is as follows:

(a). Add Time elapsed since previous noon.
(b). 10 seconds for each hour elapsed since noon.

Referring to Kapadias Scheme, Sidereal Time for previous noon (which is 12 noon 10th. October) is . . . . 13 hrs. 44 mins. 10 secs.
Add time elapsed since noon
10 0 0
" 10 seconds for each hr. elapsed since noon

### Taro

A mystic word: symbol of the four elements of the body

**Tora** | Hebrew Holy Scriptures
Question 1: What is the Zodiac? Draw it with its Signs and Rerents’ Signs.
Answer: The Zodiac or Animal Round is an imaginary belt or zone in the heavens, coinciding with the Sun’s ecliptic, and so named because of the Animal names of the twelve Signs (Ram, Bull, Twins, Crab, Lion, Virgin, Balance, Scorpion, Centaur, Goat, Water-carrier, Fish), each of which occupies 30 degrees of the Circle. This circle is the path of the Sun, Moon, Planets, as they appear to go around us; it is the Wheel of Life representing the twelve lessons of Human Experience, and its influence is constantly streaming upon our Earth.

Question 2: What is the difference between the Pisces influences and Aquarius influences?
Answer: The Piscean or Fish age began with the birth of Jesus, and during this era studies were made in secret, it being a negative epoch of blind belief and darkened spiritual understanding; warfare. The mutable, the expression is through the emotions. With the Sun moving into Aquarius, the ancient wisdom is no longer to be taught in secret; it is a positive era of light and knowledge, from which will come understanding, the mind of man replacing the emotions as the medium of expression, and Science playing an equal part with Religion towards self-realisation. Co-operation instead of separateness is the promise of Aquarius.

Question 3: What is Initiation?
Answer: Initiation is a step in the progress of unfoldment, bringing greater realisation of unity of being, thus enabling one to proceed to deeper studies of wisdom.

Question 4: What is an INITIATIC College?
Answer: An INITIATIC College is a place for meditation, study and instruction for those who have prepared themselves, by preliminary studies and disciplines, for the esoteric teachings, whose understanding and observation lead to more self-fulfilment towards Reality. It is under the guidance of a Master.

Question 5: What is the difference between an INITIATIC College and a studies’ centre plainly occult?
QUESTIONS, ANSWERS AND CULTURES BETWEEN VENEZUELA AND SPAIN (Cont'd).

Answer: Studies' Centre is a "door" which is open to any who wish to attend; here is given the basic teachings of such Occult studies as Yoga, Astrology, Religions etc. It is a preparatory class for those who wish to fit themselves for a fuller training. In MEDITATIVE College is not open to all; it is for those who are prepared to do and to be as well as to learn. It is under the guidance of a Teacher who has already trodden the Way, and who is satisfied that each pupil has fitted himself for this greater responsibility.

Question: What does the Mercury Symbol represent?

Answer: The Mercury Symbol represents the Manifestation of Soul linking Body and Spirit.

As Messenger of the 'gods', it is the go-between; as symbol of "mind", it is the place where Matter reaching up in Lower Mind, can link with Spirit reaching down to Higher Mind, once more a go-between.

COMMENTS: It is a great pleasure for me to know that you are studying, and I am very satisfied with the answers to my questions, which you have sent in your last letter. Thank you.

The spiritual interchange of letters and studies is the symbol of the fraternal union between Australia and Venezuela or the Orient and the Occident. Probably I shall get soon an opportunity to see you there.

The answers to my questions are perfectly well, and I lament that we are unable to express better our ideas in your language, but I see that you can understand me.

The drawing of the Zodiac is perfect too. There are two Zodi-acs, one of which is the intellectual or imaginary and the other is the natural or astronomic. The natural one represents the constellations and the intellectual his symbolical influences. There is no objection to be made to the other questions.

Let me have please a picture of the group, and if you cannot do it send me please one of yourself, however I hope that the group will satisfy the petition of the Director as soon as possible.

Australian Brothers:

With the Sun moving into the Sign of the Goat I send you my best Christmas and New Year Salutations wishing with all the power of my spirit that you may realise the true signification of our Mission, that the Illumination may recall you to the Cosmic Reality, awakening the Peace and Felicity in your souls.

The sublime powers of the Heaven are demanding with urgency in the present time the co-action of all good-willing men to join in groups for superior studies, implanting in this way the reign of the spirit on the Earth.

You have to realise that your group is the first in Australia but not the only. When more spiritual centres will have your country, more will be the felicity of the people. Our Mission is to form more and more groups in order to transform the social face of our Planet. We are not in right to rest while the world are losing himself in the spiritual ignorance. We are responsible for the destiny of the world.

I beg you to understand this my brothers and so you will realise the Mission of the Master and the Director.

With my sincerest blessing and the best Christmas and New Year wishes, I remain,

Yours very truly,

Jose.M.Estrada (Golong).

Notes on the COMMENTARY by Dr. de la Ferrière, (subject: the KABBALAH).

Eranome, Friday, January 4th, 1921.

The chief purpose in studying Hebrew is to get an idea of the Hebrew Keys. Each letter has a nine-fold meaning, philosophic, esoteric, etc... each one deeper than the one before it, like layer upon layer. Thus we must endeavour to extend the meaning of the letter beyond the linguistic idea.

In French, English, Spanish the A.B.C. are merely letters, but in Chinese, Hebrew, Sanscrit, Egyptian they are not only letters for the pronunciation, for they each have a value in themselves. Each letter means something, a Presence, a Platy, a Symbol, an Idea. Then there are shades of meanings:

ALEPH is the Creator-God in His first Manifestation, the super-man, as he must have been before 'original sin', the Divine Human Being. Of course the surface meaning is Ox or Bull, but the true meaning lies in its symbolic use.

BETH is a House (grammatical meaning), but a Woman (symbolic meaning). Note the parallel between the two meanings:

a. The house gives a roof where we can go and rest.

b. A woman gives a roof (shield and shelter) to the child.

Note the Esoteric meanings:

ALEPH is the Soul (Spirit), the Subtile Force, Bruna, The Ethereal power in everything, Positive, Purusha.

BETH is the manifestation of the Breath, the matter, the negative side of Creation, Akasha, Prakriti (nature).

GUIMIL is Wisdom symbolised by the apple tree and the serpent in the Garden of Eden, with Adam (Aleph) and Eve (Beth).

DALETH means a Door, denoting union between the exterior and the interior, in the link between the external world and the internal world, between the Light and the Darkness as was the door of the Temple. Thus it represents the Union between the two Worlds, in the Mystic Ceremony in the Antique Mass the Priest gives the word for the saving of the Souls of the people. He says DA-LETH: "It is Fed, Yod, Identification. The Priest makes the Sign of the Cross, (Four DA-LETHS, one each for Fire, Water, Air, Earth):" Thus this word means everything: the four Elements in both Macrocosm and Microcosm.

Thus we can reach the real idea from the Root of the word.

RUIM in Hebrew means Right, Fire, Soul. But there are other names for Soul. MEFRESCH is Soul in the sense of Physical Matter (material).

RUIM is the Soul in terms of Yoga, ie Fire internally blazing up.

YOD is the most important letter. Note its importance also in the Mathematical sense, for YOD being the 10th letter, completes the first section; 11 (eleven) is merely 1 and 1. YOD is the Key of the whole Hebrew alphabet in denoting the manifested world:

ALEPH -- 1x1 = equals 1
BETH -- 2x2 = 4
GUIMEL -- 3x3 = 9
DALETH -- 4x4 = 16
VAU -- 5x5 = 25
ZAID -- 7x7 = 49
HET -PEH -- 8x8 = 64
TETH -- 9x9 = 81
YOD -- 10x10 = 100

Total of 360 degrees equals the Circle. This is the Symbol of the world in Manifestation.
Notes on the COMMENTARY by Dr. de la Ferrière, (the KABBALAH).
Cromer. Friday, January 4th, 1932.

YOD, being the Key of the KABBALAH, is symbolic of π or 3.1415...
for the Arcanes being 22 divided by seven equals 3.1415... or YOD.

The emission of HE (5):
It appears that HE (5), similar in meaning to HE (5), can do the work for both. Number 5 is the number of MAN, manifestation of God in the flesh, and is in a way a Divine Number. Hence its omission.

Note: 5 x 8 equals 40, a significant number:
40 days' fast of the Christ.
40 meditation of Mohammed.
40 thees and Ali Baba.

The Five Mother-Letters:

ALEPH. JEHOSHUA. form S.M.A.
1 40 300
Now 341 symbolises Manifested Matter in the Physical World.
Thus Schema (French), and Scheme (English), = a Sketch or Outline.

These three letters S.M.A. form the skeleton of all the Hebrew teaching. They are found in many of the stronger words, ie Jerusalem.

The numbers have nothing to do with the letters really, when we penetrate the layers of meaning, and get a clearer view of the underlying Reality.

The Esteric Values appear to bear a relation to the geometric figures, (see the group at the beginning), while the important angles seem to be represented at the end:

<table>

</tbody>
</table>

Notice that here TAU. (the Way), comes to 360.

Commenting on the many shapes which finally become a Circle, the Doctor took as an example a drop of water falling on glass, and spreading by making many shapes and angles, until at last, the tension being evenly distributed, a circle is formed.

SUMMARY:- In this study we find grammatical symbols, philosophical symbols, esoteric symbols etc...
Do not keep to the letter, seek for the Spirit, by using the Imaginative
Keep a documentation of this for help with the KABBALAH, the TARO and other studies of this nature.
The Artistic Shape

The Artistic Shape has a basis of 5 x 5 or its multiple, e.g. 10 x 10

5 x 5 equals 25
25 x 2 equals 1000 equals 10^3

The Cubo has a very great reference to Life and Manifestation.

5 and 8 are from the same source,
- The divided halves of one oblong equal 2 square

Cubo 5^3 equals 125
125 x 8 equals 1000 equals 10^3

The Magic of Wisdom

\end{align*} \]

THE PRIMARY SIGNIFICANCE OF EXISTENCE.

1.0. FATHER-MOTHER GOD = POSITIVE AND NEGATIVE CAUSING MANIFESTATION.
We have to understand why it is necessary to do YOOGA. What is the Mechanism. How it is possible that it gives us something better in our life. The axiom, "As above, so below", tells us that the Microcosm and the Macrocosm are the same: what happens in the Human Being happens here below. The manifestation of the Macrocosm are the Planets, whose composition is mineral. The manifestation of the Microcosm, whose composition is mineral, - air, gold, copper, lead, iron etc... Hence the affinity between your mind and the Planets. There is thus a contrast between the Planets and our mineral Salts which appear to be concentrated more in the Earth's structure. Each of which is controlled by a Planet, through a corresponding Granda, each of which is controlled by a Planet, through a corresponding Galaxy, which is a cluster of Stars. There are more than one Granda, but we keep only the 7 main ones. Just as there are 7 principal Planets, 7 principal notes in the octave of music. If we find the secret of the exact frequency of each vibration from the Galaxy, we are then in a position to make use of each situation. We can heal anything, for there is a cure for anything.

For instance, Thyroid trouble is the consequence of the Planet Mercury being in wrong aspect with the Earth. True, the reason may be other, but we could give an injection of Mercurial Salt each 6th days, or put the patient in a room with the colour vibration of Mercury. None of sickness comes from some atrophy of the corresponding Granda. When we understand this we can do a wonderful work. This is the real meaning of Pastoria Astrology. It is the reason why we must learn YOOGA. For Astrology and Yoga are the base for all teaching.

You know we are so emotional. We find it difficult to RELEASE the Yoga state or outlook. We judge everything by emotion, mind or intuition.

The Earth is always affected by Planets near it. Hence the important effect of - Venus, Moon, Mercury and Mars.

Mercury affects the Saliva, Iron over-exertion causes the 'stitch' in the side'. (depth of meaning here).

Mercury affects the Thyroid, and is the Intellectual Planet, hence the Hesin as opposed to the Intuition.

THOUGHT for PREDICATION:
Realise the Parallellism which exists between the Planets and Our Bodies.

Each time the Planet Mars comes very near our Earth it affects our aggressiveness. For Mars is composed of Iron and Copper Oxide and thus affects us in our nerves. If we place this compound on the base of the skull, the person becomes argumentative and wants to fight.

Conjunction of Mercury and Venus brings Peace, ie Mercury and Copper. In the same way a 'Green' room brings happiness and peace.

We pass on to another aspect not so Physical:

YOGA is the positive way, and in time, by stages of Initiation, we understand, and REALISE the self in the Astral Way. There are the four Chakras of the Physical Plane, represented by the four elements. Then the 5th Initiation starts with the Symbol of the Nucleus (the feet), ie transmutation of the shipping, which means we are no more in the physical plane. With the 6th Chakra comes Illumination, the meeting of the Positive and Negative, of Science and Religion, when Faith and Reason become one.

The 7th is not really a Chakra; it is the annihilation or the cessation of the illumination of the 6th. It is the opening of the Brain, the PORD: RNNR. There is no work to illuminate the seventh from the sixth; we go on to the seventh without extra labour.

After one year's practice, we can begin to concentrate to make rises - KUNDELINI. To do this we must be able to keep the ASANAS three hours.
Corrent by Do
correction on the Symbol of the Chakras, with Breathing.

Mercury is the "Messenger of the Gods", ie the go-between for the Physical and the Spiritual Life. (5th Chakra).

The Moon and Sun are not really Planets, they are more a Symbol, more an Emotion of a State. They are the Symbolical Eyes, the Moon the Eye by Night, the Sun the Eye by Day. The Moon equals Ida, (Negative, subjectivity), the Sun equals Pingala, (positive, objectivity).

Make a work on Concentration. The Moon and the Sun are in reality the centre of Concentration. These two Grands, the Pituitary, (Moon), and Pineal, (Sun), in the centre of our concentration attract Kundalini and help to make it rise. Thus it is only the work at the Base of the Spine, but also the concentration from above. (We have a good physical example of this in the Moon attracting the water of the Earth, with the resultant tides. Ref. also the triangle Earth pointed downwards, and clinging with its root to its lowest, while the great unseen power takes the other two angles and lifts then up as it were.)

Extracts from Lecture by Doctor de la FERRIERE, after Yoga, 15.1.52.

While on the Physical Plane, YOGA brings health, it is on the Mental Plane, (Concentration etc.) that the main work is done. We must try to do the Asana in perfect style and then keep it, say from 1 to 5 mins. We must know exactly the position of the Chakras, as well as their colour etc... now keep Mental Concentration.

The purpose of Yoga is union with the Universal Mind, no matter what Religion or Creed we follow. A Yogi must be able to assimilate Truth and teach it, control of body and mind, but at the same time the faculties improve; there is a better understanding, better seeing, hearing, smelling, tasting... All these come with the practice of Yoga. It is not a question of age. The stiffness or elasticity is what counts.

We must realise the Yoga Philosophy and live all the work in the Yoga system or method. A Yogi is not only a man who doesn't get irst or sneeze, he is much more. Yoga is not the discipline that we see; an ecstatic life is not the making of a Yogi.

Try to universalise everything. Start in our own home. Try to make an IDENTIFICATION with all; feel the life of a tree, a stone, a dog.

No more have any dogmatic principle. A student of Yoga does not have a special BELIEF. He thinks, no more that his Religion is the only true one, his fellow believers the only pure people. There is no longer a Law nor a Yogi that we give up all religious principles in an attempt to give the self to universalism... One can find the Christ, the Buddha etc... Yoga means Identification and not limitation.

The 84 Traditional Asanas reflect the image of 84 animals living on this Planet, Camel, Snake etc... This is symbolic as the snake represents Wisdom or Contemplation, and we seek harmony with this vibration.

Each Asana Position has three Meanings:
1. Physical: healing.
2. Astral: vibrations give improved faculties, intuition etc... The development of memory and intellect etc...
3. Spiritual: Better Vibrations to put the self in higher Planes, and to reach the Universal Consciousness, Evolution...

Learn to live all the day thus, 1e KARMA YOGA, the Yoga of Action, we think Identification while we work. Ref. A.H.B. who tells us to work on, stamp correctly, for life begins with little details.

Thus start with every day work, and put that in the Yoga style, ie Universal Understanding. Give up all our I-tvism; forget it, and be FREE, we are prisoners to our I-tvism; the Little Zodiac in our head, limited by different little influences such as time etc... Reach up to the Great Universal Zodiac, where there is no limitation of culture, education, nationality, etc...

The Mantras are Universal Keys by their Vibrations.

(Cont’d Page 2 - Synthesis)
Yoga is the foundation of our work. We are not concerned only with the physical practice of Hatha-Yoga but with its deeper meaning and realisation and for that we have to have a knowledge and understanding of the Chakras. We have come from the Non-Manifest, from God, and we are going back to our source. We have cycled down through the planes and are now on Earth and have almost lost sight of our Spiritual Reality. We manifest through the Physical, Emotional, Mental, Intuitive planes and then the Spiritual in our return to God. To do this, we work first for ourselves, for our own evolution, and secondly for our fellow men.

It is necessary for us to transcend our powers in order that we can return to the Spiritual Soul leaving the personality behind. To do this we must realise the Truth for it is a fact that there is no religion higher than Truth, and the injunction is "To know the Truth, and the Truth shall set you free."

TO ATTAIN THIS REALISATION IT IS NECESSARY TO DO YOGA.

By the union of SIDDHAS (Individual Consciousness) with PARASHIVA (Universal Consciousness) we attain this Realisation. The Bible refers to it as the "Pearl of Great Price." When once an individual attains even a faint realisation of the wonder of this realisation he could "swell all that he hath."

We are the vibrations that made us because we were there to be made at the time. Past Karma has helped to bring us into this particular manifestation. We are the doors by which the Universal can enter into the Individual, personal soul, and as long as we have not made the realisation, the transmission from the physical to the spiritual we are ruled by our stars, we do not rule them. Thus we are "fettered, caged and confined" until we make the conscious effort to attain transmission as aptly described by Tennyson as 'Man's incommunicable thirst for God'.

CHAKRAS. The Chakras are just beyond the physical glands, and though more than 7 in number we deal only with the 7 because they are the most important. They are the link whereby we reach our higher selves, for we have higher bodies which are greater than the physical body. The Chakras are linked with the endocrine glands, and when the medical profession states that we are our glands they are correct because the Chakras are the super physical manifestation of the physical glands (endocardial).

Prana and Kush flow through the Chakras, working together in order to give manifestation.

We must learn how to use the Chakras in order that we may develop ourselves. By using the Chakras we illuminate them after the other and those illuminations we term Initiations. Such Initiations are between God and ourselves, and have nothing to do with any degree of initiation conferred upon one human being by another.

We are linked very lightly to earth. KUNDALINI (inner power represented by the Serpent) resides within each one of us at the base of the spine. It lies sleeping in Muladhara Chakra awaiting its possibility to rise. For this to take place the uddhis become cleansed, we must purify ourselves. That is the reason we must consecrate with PHYSICAL CLEANLINESS which embraces more than physical bathing, and it is for this reason when we consecrate HATHA-YOGA that we are subject to discipline which requires abstinence from eating of flesh.

The command "Thou shalt not kill" (which is not qualified in any way, such as "thou shalt not kill man"), Butler's to us a spiritual awareness necessary for our evolution. A respect and consideration we must have for all Life. Apart from the spiritual aspect of the command it must be realised that we contaminate our own flesh by partaking of animal flesh, which when killed, in imbued with physical impurities, etc., and which we absorb into ourselves.

Apart from the fact that purification increases in the flesh on the death of the animal, at such time also the physical impurities which are there remain there as we have no method of separating these impurities, and it is therefore a matter of common sense only to realise that by absorbing the protein supposedly necessary to man by partaking of meat, we also unfortunately absorb the Toxin. The proteins necessary and free from Toxin are available in fresh butter, cheese, eggs, milk etc.

This is by the way, but necessary for the student to understand that physical purification requires a certain amount of discipline.

Returning more directly to the subject of the CHAKRAS, the body also has within it PFENGLA (positive element - masculine) and EMA (negative element - feminine). PFENGLA and EMA intertwinie and open up the way through their power for KUNDALINI to rise. (continued)
Referring to the diagrams (Page 1), when the first four Chakras have been illuminated (MULADHARA, SVADHISTHANA, MANIPURA, ANAHATA) it is then that we commence to leave the physical plane. We no longer crawl (symbolised by the Snake,) but we fly (symbolised by the Eagle).

Because of the importance of the Chakras they must be learnt and understood for the student to comprehend and realise Yoga tuition.

The Symbols, Colours, Elements and Planets governing the Chakras must be memorised.

Brief Delineation:

1. **MULADHARA**: (Sex Plexus) Where KUNDALINI sleeps.

2. **SVADHISTHANA**: Very important. Has control of our nervous system. 10 Radii, 72,000 Nerves.

3. **MANIPURA**: Tremendously important. It is the filter. Can cleanse the whole of the body.

4. **ANAHATA**: Governs the emotions. It is here we are leaving the physical plane. After we have cleansed the emotions then we are beginning to be ready for powers which we shall not use for selfish ends.

5. **VIJAYA**: Represented by the double triangle - symbolises God reaching down to Man, and Man reaching up to God.

7. **SAHASRA**: (Brahma Bandra). Reintegration in the GREAT ALL.

**NOTE:**

Students are advised that the COLOURS symbolising the Chakras concern only the Chakras and not the potal combinations.

A further lesson will be given on the Chakras detailing the complete colour combinations.

---00---

**For Your Contemplation:**

There are four types of man.

He who knows and knows he knows - He is wise, follow him.

He who knows and knows not he knows - he is asleep, wake him.

He who knows not and says he knows - he is a fool, scorn him.

He who knows not and knows he knows not - he is a child, teach him.

---00---
by Dr. de La Ferrière, on the lesson, "Anahata Chakra." 4.2. 52.

The Chakra selected for the lesson, the 12 petalled Chakra, Anahata, is most important. What I want to do is just to direct your attention over a few symbols, and for that the 12 petalled Chakra is important for two reasons:

(1) 12 Petals to make you understand immediately who 12 Disciples of the Christ.

(2) It is the Chakra of the Cardinal Points, from the Heart to Love. The Christian Mission was based on Love.

The Chakra of the heart is the symbol of the Instructor of the World. You know that each Chakra is a symbol of one degree of Initiation.

1. Muladhara 1st Degree Getu! (Degree of Notice, ........)
2. Swadhisthana And "On Light" Gopapa " " " Affiliated
3. Manipura And "Gelanag " " " Master
4. Anahata 6th " Guru. " " " Instructor
5. Viscudha 8th " Sat-Guru. " " " Disciple
6. Anah " 6th " Acharal " " " Missionary
7. Sahasrara 7th " " " " " Master.

Anahata represents the degree of Instructor. 12 petals, 12 signs of the Zodiac. To be an Instructor, you can be that only if you realize what is a Zodiac, what means each of the 12 signs. If you have your reincarnation through each of these signs, you have the experience of each sign in one physical life.

There is a belief that the 12 disciples were not 12 men and that Christ himself was not a man. We don't discuss whether this is true or not. It is just an hypothesis that Christ was only a Sun and the 12 disciples were Signs of the Zodiac. It could be also an Instructor School where 12 departments were known and people have attained the 12 petalled Chakra. Anyway, if the Instructor or Christ himself were solaced in the 12th or not is not important.

Remember the LETTER IN THE CHAKRA ... that is important, the same as YOD in Hebrew in the Key of the Kabalah. Give your attention on something else. All the Kabalists is based on that as called the Kabalistic Base. If you visualize a little bit more, then you can see the 7 foundations.

1. KETHER: The Alchemic of the Middle Ages was able to transform lead to gold, return to Sun. Rising of Intelligence.
2. HEPH: From Wisdom, "Rabbin", to Sahadsana, "Skeptic", ... From the 1st Degree, Getu, to Maruca, the 9th. Everywhere you find that. It is really the key of all the Kabalistic letters, YOD which gives the possibility of all the Alchemic.
3. GEBUR: The number 10 equals the manifestation of Jesus, the Initiate. He was 10 when he was Emmanuel and became Jesus.
4. 10 in the number of the Chakra.
5. YOD is the foundation of 9 with which you make the circle. The circle is the world in manifestation, the 12 letters of the Kabalah, The 7 keys, (Satni) are the 7 planets. Hence the function 8 equals 3.1415 etc... 21.
6. Visualize the Chakra also in the idea of the parallel between the Macrocosm and the Microcosm. There exists in the world a physical...
The Magic of Wisdom

PART 2.

There is no single, the core form of outline in Europe and Asia, Spain and Portugal on Europe, Italy on point of Milan, Greece on Italy, the way of travel in Europe.

If we are looking in the world to find the magnetic points of the world, a in Europe, a in Asia. All those magnetic points were places of great pilgrimages.
